

DOCUMENT 04

Seller Policies

Operating standards for onboarding, listing, fulfilment, returns and conduct on the SoftStore.pk marketplace.

COMPANY	SoftSkills Engineering
PLATFORM	SoftStore.pk
EFFECTIVE DATE	14 August 2026
VERSION	1.0
ISSUED	1 August 2026

1. Onboarding and eligibility

- **Identity.** A valid CNIC for individuals, or NTN/STRN for registered businesses and brands.
- **Bank account.** A Pakistani bank account in the name of the seller or the registered business, required for settlement.
- **Contact.** A working mobile number for order and delivery coordination, and a pickup address a courier can reach.
- **Verification.** We may verify seller identity and premises. Documents are reviewed by a person, and a rejection tells you which document and why so you can resubmit.

2. Listing standards

- **Accuracy.** Descriptions, images and specifications must be accurate. Misleading listings are prohibited.
- **Images.** Use your own high-quality images without watermarks. Do not use manufacturer stock images unless you are an authorised distributor.
- **Pricing.** Prices must be transparent and must not constitute price gouging.
- **Categorisation.** List in the correct category. Category determines the commission rate, and deliberate miscategorisation to attract a lower rate is treated as a breach.

3. Fulfilment and shipping

- **Dispatch time.** Process and dispatch within 24 to 48 hours of order confirmation.
- **Packaging.** Package securely to prevent damage in transit.
- **Logistics.** You arrange your own dispatch. Courier integration is not available at launch; the Platform records order and delivery status.
- **Stock accuracy.** Because the counter and the storefront share one inventory, stock stays current automatically as you sell. Manual adjustments must still be recorded honestly — every movement is written to an immutable ledger.

4. Returns and warranties

- Accept returns within **seven (7) days** of delivery for items that are defective, damaged or materially not as described.
- Return claims are reviewed by our support team. Where a claim is upheld, the return cost is borne by the seller.
- Honour any warranty you offer and give the buyer clear instructions for claiming it.

5. Performance expectations

Sellers are expected to meet the following standards. These are stated expectations used in review of a store's standing; they are not automatically computed penalties.

MEASURE	EXPECTATION
Order cancellation rate	Below 2%
Late dispatch rate	Below 5%
Return rate	Category-dependent, typically 3–5%

Where a store falls persistently short, the escalation is:

1. Warning, with a temporary limit on listing new products.
2. Reduced storefront ranking.
3. Temporary store suspension.
4. Permanent delisting and store closure.

NO FINANCIAL PENALTIES AT LAUNCH

Earlier drafts specified a PKR 100–500 charge per seller-initiated cancellation. That is not applied. A charge the system cannot compute or collect is not enforceable, and we would rather state a rule we can keep.

6. Prohibited practices

- **Off-platform transactions.** Attempting to bypass the Platform and transact directly with a buyer to avoid commission.
- **Review manipulation.** Buying or generating favourable reviews for your own products, or adverse reviews for competitors.
- **Counterfeit goods.** Zero tolerance. Confirmed counterfeit listings result in immediate suspension.
- **Sharing personal contact details** with buyers in order to move a transaction off-platform.

7. Communication with buyers

- Communicate politely and professionally at all times.
- Buyer contact details are provided solely to fulfil the order they relate to and may not be used for marketing or retained for other purposes.

- A seller-to-buyer messaging portal is not available at launch. Where contact beyond delivery is needed, it is arranged through support.

8. Changes to these policies

These policies may be updated. Material changes affecting sellers are communicated before they take effect, and the effective date on the cover is revised.
