Commission and Fee Schedule

What a seller is charged, on which sales, at what rate, and when they are paid.

COMPANY	SoftSkills Engineering
PLATFORM	SoftStore.pk
EFFECTIVE DATE	14 August 2026
VERSION	1.0
ISSUED	1 August 2026

1. Overview

SoftStore.pk operates a performance-based commission model. Registering as a seller and listing products are **free**. A seller is charged only when a marketplace order is successfully delivered.

COUNTER SALES ARE NEVER COMMISSIONED

Sales a seller rings up at their own counter through the SoftStore POS register carry **zero commission** and **zero transaction fee**. Commission applies only to orders the marketplace brings the seller.

2. What is deducted

At launch a single deduction applies to a delivered marketplace order:

- **Marketplace commission** — a percentage of the item sale price, set by category (§3).

The following are **not** charged at launch:

- **Payment gateway fees.** Every marketplace order is cash on delivery; no card or wallet gateway is in use, so there is no gateway cost to pass on.
- **Listing fees, setup fees or monthly catalogue charges.** None, on any plan.
- **Sales tax on commission.** Tax treatment is being confirmed with a qualified practitioner and is not applied until that is settled. Sellers will receive notice before any tax line is introduced.

SELLER'S OWN TAX

Each seller remains responsible for their own tax position, including any sales tax on the goods they sell and their own income tax filing. The platform records and exports what it holds; it does not compute or file a seller's tax.

3. Commission rates by category

Rates are set per category and are reviewed periodically. Any change is effective-dated and applies only to orders placed **after** the new date, never retrospectively. Sellers receive at least **30 days'** notice of an increase.

CATEGORY	SUB-CATEGORY	COMMISSION
Electronics	Mobile Phones	1.5% – 3%
	Laptops & Computers	2.5% – 4%
	Accessories (cables, cases)	8% – 12%
Fashion	Men's & Women's Clothing	10% – 15%
	Shoes & Accessories	10% – 12%
Home & Lifestyle	Furniture	5% – 8%
	Home Decor	10% – 15%
Health & Beauty	Skincare & Makeup	8% – 12%
FMCG / Groceries	Packaged Food	3% – 6%
	Fresh Produce	2% – 4%
Automotive	Auto Parts	5% – 8%

HOW A RATE IS CHOSEN WITHIN ITS BAND

The band reflects margin variation inside a category. A seller's applicable rate is shown against every product in their dashboard and on every commission ledger entry, so the exact figure charged is always visible before and after a sale.

4. Worked example

A PKR 10,000 clothing order, at the 10% floor of the Fashion band:

LINE	PKR
Buyer pays for the goods	10,000
Marketplace commission @ 10%	– 1,000
Seller receives	9,000

Commission is calculated on the value of the goods, not on delivery charges. Every calculation is written to a commission ledger the seller can inspect line by line against the order that produced it.

5. Settlement and payout schedule

SELLERS ARE PAID TWICE A MONTH

Payouts are released on **two fixed dates each month**: the **15th** and the **last day of the month**. There are no payouts on any other date.

5.1 The two payout dates

PAYOUT RUN	RELEASED ON	COVERS ORDERS CLEARED
Mid-month	15th	1st to 14th of the same month
Month-end	Last calendar day (28th, 29th, 30th or 31st)	15th to the end of the same month

Where a payout date falls on a weekend or a gazetted public holiday, the run is processed on the **next working day**.

5.2 When an order becomes payable

- **Clearance.** An order becomes payable once it has been delivered *and* the seven-day return window has closed.
- **Cash on delivery.** A cash-on-delivery order additionally requires the courier to have remitted the cash collected.
- **Cut-off.** An order that clears after a run's cut-off simply moves to the next run. Nothing is lost or skipped; it is paid on the following date.

WORKED TIMING EXAMPLE

An order delivered on 3 March clears on 10 March, once its seven-day return window closes, and is paid in the **mid-month run on 15 March**. An order delivered on 12 March clears on 19 March, misses the mid-month cut-off, and is paid in the **month-end run on 31 March**.

5.3 Method and record

- **Method.** Bank transfer to the seller's registered Pakistani bank account. The account must be in the name of the seller or the registered business.
- **Statement.** Each run produces a statement listing every order paid, the commission rate applied and the amount deducted, reconciled against the commission ledger.
- **Minimum.** No minimum payout threshold applies. Whatever has cleared is paid.

AT LAUNCH, THIS SCHEDULE IS OPERATED MANUALLY

Automated payout runs are not yet in service. The two dates above are firm commitments and will be met, but the run is executed by hand against the commission ledger until the automation ships. Earlier drafts promised a bi-weekly automated cycle; a fixed schedule that is actually kept is worth more than an automated one that is missed.

6. Returns, cancellations and reversals

- **Returned or refunded orders.** Commission is reversed in full. A seller never pays commission on revenue they did not keep. The reversal is recorded as its own ledger entry rather than by altering the original, so the history stays auditable.
- **Undelivered cash-on-delivery orders.** No commission is charged and the goods return to the seller.
- **Return shipping.** Where an item is returned because it was defective, damaged or materially not as described, the seller bears the return cost.
- **Seller-initiated cancellations.** No financial penalty is charged at launch. Repeated cancellation affects storefront ranking and, if persistent, store standing.

7. Promotional campaigns

Where a product sells during a SoftStore-funded promotional campaign using a platform-issued voucher, the discount is borne by SoftSkills Engineering and the seller is paid on the original selling price. Discounts a seller sets themselves are borne by the seller, and commission is calculated on the discounted price actually paid.
